| <p>TASK: Please review this FOIA Request, search for responsive documents, inform me, Dayle, of other persons in EPA who are to be tasked in order to do our due diligence. The CMU MUST be included in any dialog with the requester to narrow the scope of the request. This is to ensure it is properly documented, approved by the requester, and uploaded into the correspondence section of FOIAonline. This change was made to ensure we meet FOIA law prescribed in the FOIA Improvement Act of 2016. Documenting these changes is very important to the process, failure to do so results in making the agency liable under an appeal. In addition, extension requests to the requester must be documented in a similar manner. The CMU staff (FOIA Coordinators and FOIA Officer) need to be included on all internal and external communications to ensure our response is defensible. This change was made to ensure we meet FOIA law prescribed in the FOIA Improvement Act of 2016 and thus reduces the Agency's liability under an appeal. Extension requests to be documented, too. If it is likely to need extension request, fee limit discussion, clarification or change in scope of request, please let me know ASAP. Thank you so much.</p> | |

| <p>REQUEST DESCRIPTION: RETTEW is working on behalf of WDEQ to determine a comprehensive site history for the Former Franco Wyoming Refinery located southwest of the intersection of East 4th Street and South Beverly Street, Casper, WY. WDEQ has provided limited information relating to the site that references an EPA investigation conducted at East Junior High School (900 South Beverly Street) in response to the potential for the presence of wastes associated with the former refinery. A news article (attached) references the findings of the investigation. RETTEW has not been able to find any documentation relating to this investigation. MyProperty and Envirofacts searches using both street names and potential addresses did not yield any results for the former refinery or junior high school.</p> | 2 |
| <p>REQUEST DESCRIPTION: RETTEW is working on behalf of WDEQ to establish a complete site history for the Former Texas Gulf Sulfur Plant located at 342 US HWY N. 20, Worland, WY. WDEQ has provided very limited information relating to the site. We are aware of the presence of elemental sulfur at the site and that a sulfur fire was responded to by local authorities on July 7, 2017. RETTEW would like to review any emergency response documents the EPA may have related to the site. | <p>REQUEST DESCRIPTION: RETTEW is working on behalf of WDEQ to establish a complete site history for the Former Thermex Energy Bucknum Plant located at 12050 Bucknum Road, Casper, WY. WDEQ has provided very limited information relating to the site. A reference to an EPA determination that Thermex is the responsible party for contamination (relating to a former explosives plant) at the site is the only reference to any EPA involvement at the site. RETTEW is requesting information relating to this determination by the EPA. A MyProperty search yielded the following information at the links below:-</p> <p>https://ofmpub.epa.gov/enviro/myproperty.html?p_addr=12050+BUCKNUM+ROAD&p_city=Casper&p_state=WY-</p> <p>https://iaspub.epa.gov/enviro/fii_query_dtl.disp_program_facility?p_registry_id=110041354575-</p> <p>https://ofmpub.epa.gov/enviro/afs_reports.detail_plt_view?p_state_county_compliance_src=5602500023- https://echo.epa.gov/detailed-facility-report?fid=110041354575</p> <p>We were not able to find any information relating to the determination by EPA that Thermex is a responsible party by following the links.
